

The Society of V.I. FERT Foster/Adoption Application

You must be over 18 years of age to Foster or Adopt without parental consent

The Process

The processes to foster or adopt are similar. There is also the option of Fostering to Adopt - where the ferrets are placed in the home as fosters so that first time ferret owners can test out living with ferrets, prior to the commitment of adoption. To ensure the best ferret care possible, all potential foster parents and adopters must go through the application process, detailed below:

- 1. Written Application Form.** Once we receive the completed Foster/Adoption application form, our directors will review the application form and arrange for an interview time. Directors will note any initial questions, issues or items requiring clarification.
- 2. Interview.** Step two is an interview with one of our directors (usually via telephone). We may discuss any concerns you have, as well as your expectations regarding ferret ownership and assess your ferret knowledge base/experience. At this time, we also gather information to assist in helping find a suitable ferret match. After a successful interview, your references (provided in the written application) will be contacted.
- 3. Home Visit.** Step three is a home visit to ensure that the family is fully prepared for their new furry arrival. During the visit we will look for any ferret hazards, provide advice on ferret proofing and answer any questions you may have. For people adopting from areas where we cannot do an in-home visit, a video inspection and chat can be arranged.

*** This process can take up to two weeks, depending on your location, the availability of directors as well as our ability to contact your references. We appreciate your patience. The adoption or fostering process may be terminated at any time if the directors feel that they have been misled by the party wishing to adopt/foster or if the directors feel that a ferret's needs will not be adequately met. ***

Filling out an application does not guarantee an adoption or foster ferret placement.

It is possible for homes to be approved only to have any available ferrets not be suitable for the home; in these situations, the adopter or foster parent may request being notified of future ferrets that might be a better match. This process is not meant to insult or discriminate, but rather to ensure that the animals in our care find homes that match their needs as well as possible.

Health Check:

A veterinarian checks all ferrets within 2 weeks of intake.

*A clean bill of health from the veterinarian simply means that the animal did not display any sign of illness at the time of the visit, and no health concerns were raised by the subsequent foster family (if applicable). It is not a guarantee that health conditions such as lymphoma, insulinoma or adrenal disease will not develop in the future.

Foster Information: Foster families are responsible for purchasing and supplying food, bedding, dishes, toys, litter boxes and litter for their ferrets. (Sometimes these items will come with ferrets). If a veterinarian visit is required, the foster parent is responsible for booking and taking the ferret(s) in. The Society of V.I. FERT will subsidize or fully cover costs of foster ferret veterinarian visits as required and as funds are available.

Adoptive families are responsible for all pet related costs once adoption is final.

Foster-to-Adopt families will be treated as foster families unless otherwise stipulated and agreed upon at the outset.
